

PLAN - HOW TO INSTALL

1.

Mark the holes you will use to mount the lamp.

Use pencil or permanent marker.

2.

Drill the marked spots and install the proper wall plugs.

Different ceiling types require different wall plugs.

3.

Shut off the main electrical supply at the fuse box/circuit breaker.

Connect lamp to the power source.

4.

Screw the metal base to ceiling using installed wall plugs. Be sure it is stable and holds strong.

5.

Take the outside cover and place it on the metal base – to match the side holes.

6.

Screw in the 3 side screws tight to make sure the lamps hangs on the ceiling.

You may need an assistance to hold the lamp shade during this stage.

Handling and Installation Instructions.

Please read the following instructions carefully before beginning with the installation:

- Remove the packing material carefully.
- Make sure that all items are free of damage and all cables are completely isolated.
- It is recommended to have the lighting fixture installed by a qualified electrician.
- The manufacturer does not enclose any wall plugs with the lamps. It is recommended to only use wall plugs that are determined to be used for installations of minimum 20 kg of weight.
- Due to the lamp`s relatively high dead weight it is highly recommended to install the lamp on adequate surfaces e.g. brick or similar solid underground.
- Installations on suspended ceilings should only be performed after consultation with a specialist and upon approval of the facility proprietor.
- Only use the recommended light bulbs in order to prevent overheating

Care Instructions:

- To clean the shade from dust wipe with a soft and dry or slightly damp cloth.
- Do not use any abrasive cleaners. This might cause permanent stains and damage the shade.
